

EDUCATION

- **Boston University** Boston, Massachusetts
Master of Science in Computer Science; GPA: —
Sep. 2018 – Jul. 2020
- **Shanghai Jiao Tong University** Shanghai, China
Bachelor of Software Engineering; GPA: 3.3/4.0
Sep. 2014 – Jul. 2018

EXPERIENCE

- **Fast Retailing (Uniqlo China) Trading Co., Ltd.** Shanghai, China
Software Engineer
Oct. 2017 – Nov. 2017
 - **Allocation Program:** Participated in the research of allocating products within different stores among the country according to various needs, and reduced logistic fees.
- **Luoyang West Branch of China Mobile Henan Co., Ltd.** Luoyang, China
Software Engineer
Summer 2017
 - **Website Service Development:** Worked as an intern, dealt with the design and development of server programs on the website.
- **Zhengzhou Railway Bureau** Zhengzhou, China
Software Engineer
Summer 2016
 - **Signal Control Simulation:** Worked at the Department of Information as an intern. Participated in the debugging and optimization in parts of the signal control projects, which is part of the railway signal simulation.

PROJECTS

- **Power Attack Defense: Securing Battery-Backed Data Centers**
Coder, 16 hours/week
Jul. 2017 – Nov. 2017
 - **Signal Control Simulation:** Directed by professor Chao Li, Assisted a senior student in optimizing the research result which was published on the International Symposium on Computer Architecture; optimized the analysis on the defense and offense against server farm by analyzing the complete action of more intelligent offenders, and came out with various defensive strategies.
- **Wheeled Robot Auto-Charge Project**
Coder; 16 hours/week
Sep. 2016 – Oct. 2017
 - **Robots Related Work:** Worked at the warehouse at the China Baowu Steel Group Corporation, and experimented on the inspection robots; compared the related research papers on auto-charging, and improved the inspection robots working efficiency based on SLAM algorithm.
- **Design of Five-stage Pipeline CPU:** Designed a CPU with 20 MIPS commands in quartus-II. Gained deeper understanding of CPU and how different stages work together.
- **YFS File System:** Developed distributed file system based on the thesis of Frangipani: A Scalable Distributed File System, also the lab of MIT 6.824. Gained knowledge of how distributed file system work.
- **Design of Take-out Food Delivery Assistant:** Responsible for the Android app development, including infrastructure setup, switch of interfaces, customer data management, map display and route planning.
- **Online Bookstore Design Project:** Applied tomcat and apache as local server, and used MySQL to store data about customers, books and sales.
- **Distributed System Course Project:** Complete MapReduce, Raft project under the instruction of Han Dong. Improved skills with the design and understanding of Distributed System, and also the ability of multithread programming using go routine.

ACTIVITIES

- **Tutor:** Personal maths tutor for a high school student for three years.
- **Organizer:** Organized Union Ball of SJTU and SUFE.

HONORS

- **MCM Prize:** Honorable Mention (30%) at Mathematical Contest in Modeling.
- **Sports Meeting:** Second Place in the Mens 100-meter Running of the Schools Spring Sports Meeting in SJTU.
